BENCHES FROM HESS –
high quality, durable and impeccably designed

Benches from Hess stand for the utmost in quality and durability, have a high level of utility as a place to take a break, and serve as visual highlights in urban spaces.

The benches are available in a wide range of designs, but they all share a few common characteristics: select weatherproof materials that captivate with their sophisticated look and feel as well as unrivaled workmanship and, thanks to their exemplary design, they cut an exceptionally fine figure in any urban environment!

Smart benches – for smart urban spaces.

You want to offer your residents, guests, and visitors something special? No problem at all.

While they enjoy a break on our bench, they can charge their smart phone or tablet at the same time. It's very convenient and completely wireless thanks to our integrated QI charging stations, which are perfectly embedded in the battens of the seat and specially designed to meet the demands of outdoor use.

It is also possible to install USB charging sockets on request.

With each design, we make sure that the cables and plug connections are laid and attached in such a way that they can withstand the most challenging environments – whether in terms of weather or vandalism.

Every visit to your shopping mall, marketplace or outdoor area will thus be an unforgettable experience without any unpleasant surprises.

Benches from Hess – with integrated added value.
Technical specifications

We integrate the waterproof 12/24V qi certified wireless charger range from Scanstrut, Type ROKK, which enables phone and tablet charging in a very easy and comfortable way.
